

DIMENSION			MEASURE			DIMENSION			MEASURE		
APPLIANCE						Indicates whether a protection tray against heat or contact is needed with oven. Default is "N"			No		
Product width			580			Indicates whether a ventilation opening in the back side of cabinet is needed or not with oven. Default is "Y"			No		
Product depth			510			Indicates the position of the opening in the back side of the cabinet with oven			N/A		
Radius of product corner			18			MIN Width of rear opening required with oven			0		
Product height (MAX protrusion from the worktop)			38			MIN Depth of rear opening required with oven.			0		
Underneath the bearing area of the appliance			33			MIN AREA of rear opening required with oven			0		
Distance between cut out and top frontal projection			10			MIN distance from cabinet to rear wall, with oven			0		
Distance between cut out and top lateral projection			10			Indicates whether a ventilation opening in the top front side of cabinet is needed or not with oven. Default is "N"			No		
Plateau thickness			11			MIN Frontal gap required, with oven (2)			0		
Gas outlet positioning			N/A			MIN frontal opening area required with oven			0		
Gas outlet X positioning			0			WITH CABINET					
Gas outlet Y positioning			0			MIN worktop thickness with cabinet			20		
Power cable			With product			MAX worktop thickness with cabinet			50		
Power cable positioning			Rear right			Indicates whether a protection tray against heat or contact is needed. Default is "Y"			Yes		
CUT OUT						MIN distance from bottom line of appliance to protection tray			90		
MIN front distance from cut-out to end worktop			50			Indicates whether a ventilation opening in the tray is needed or not with cabinet			No		
MIN rear distance from cut out to wall/furniture			70			Recess dimension X			0		
MIN lateral distance from cut out to wall/furniture			100			Recess dimension Y			0		
MIN height from worktop to above furniture			400			Positioning dimension X by axis			0		
MIN cut out width			560			Distance of the tray from the back panel/wall			0		
MAX cut out width			562			Indicates whether a divider is available			N/A		
MIN cut out depth			490			Indicates whether a ventilation opening in the back side of cabinet is needed or not. Default is "Y"			No		
MAX cut out depth			492			Indicates the position of the opening in the back side of the cabinet.			N/A		
MIN cut out radius			6.5			MIN Width of rear opening of the cabinet			0		
MAX cut out radius			16			MIN Depth of rear opening of the cabinet			0		
FLUSH INSTALLATION						MIN AREA of rear opening of the cabinet			0		
Indicates whether a flush installation is possible. Default is "N"			No			MIN distance from cabinet to rear wall			0		
MIN Milling rabbet width			0			Indicates whether a ventilation opening in the top front side of cabinet is needed or not. Default is "N"			No		
MAX Milling rabbet width			0			MIN Frontal gap of the cabinet			0		
MIN Milling rabbet depth			0			MIN frontal opening area of the cabinet			0		
MAX Milling rabbet depth			0			INSTALLATION SPACE					
Milling rabbet thickness			0			Depth of immersion underneath the appliance			0		
Radius milling rabbet			0			Width protruding area below bottom box			0		
Flush installation KIT (2)			N/A			Depth protruding area below bottom box			0		
Indicates the minum worktop thickness with standard installation for gas			0			Protruding area: X positioning			0		
Indicates the maximum worktop thickness with standard installation for gas			0			Protruding area: Y positioning			0		
Indicates the minum worktop thickness with flush installation for gas			0			ACCESSORIES FOR INSTALLATION					
Indicates the maximum worktop thickness with flush installation for gas			0			Gasket			Pre assembled		
WITH OVEN						Clips			Separate		
Indicates whether the cooktop can be installed above oven. Default is "Y"			Yes								
MIN worktop thickness with oven			20								
MAX worktop thickness with oven			50								

DIMENSION		MEASURE	
		KIT	
Injector KIT		N/A	
Elbow KIT		N/A	
COOKTOP HOOD INSTALLATION ONLY FOR GAS			
MIN distance from cooktop to above furniture		0	mm
MIN distance between cabinets above the cooktop		0	mm
MAX distance between cabinets above the cooktop		0	mm
