

DIMENSION			MEASURE			DIMENSION			MEASURE		
APPLIANCE						Indicates whether a protection tray against heat or contact is needed with oven. Default is "N"			No		
Product width			580			Indicates whether a ventilation opening in the back side of cabinet is needed or not with oven. Default is "Y"			No		
Product depth			510								
Radius of product corner			10			Indicates the position of the opening in the back side of the cabinet with oven			N/A		
Product height (MAX protrusion from the worktop)			30			MIN Width of rear opening required with oven			0		
Underneath the bearing area of the appliance			50			MIN Depth of rear opening required with oven.			0		
Distance between cut out and top frontal projection			10			MIN AREA of rear opening required with oven			0		
Distance between cut out and top lateral projection			10			MIN distance from cabinet to rear wall, with oven			0		
Plateau thickness			4			Indicates whether a ventilation opening in the top front side of cabinet is needed or not with oven. Default is "N"			No		
Gas outlet positioning			N/A			MIN Frontal gap required, with oven (2)			0		
Gas outlet X positioning			0			MIN frontal opening area required with oven			0		
Gas outlet Y positioning			0			WITH CABINET					
Power cable			With product			MIN worktop thickness with cabinet			20		
Power cable positioning			Rear right			MAX worktop thickness with cabinet			50		
CUT OUT						Indicates whether a protection tray against heat or contact is needed. Default is "Y"			Yes		
MIN front distance from cut-out to end worktop			0			MIN distance from bottom line of appliance to protection tray			20		
MIN rear distance from cut out to wall/furniture			70			Indicates whether a ventilation opening in the tray is needed or not with cabinet			No		
MIN lateral distance from cut out to wall/furniture			100			Recess dimension X			0		
MIN height from worktop to above furniture			400			Recess dimension Y			0		
MIN cut out width			560			Positioning dimension X by axis			0		
MAX cut out width			562			Distance of the tray from the back panel/wall			0		
MIN cut out depth			490			Indicates whether a divider is available			N/A		
MAX cut out depth			492			Indicates whether a ventilation opening in the back side of cabinet is needed or not. Default is "Y"			No		
MIN cut out radius			6.5			Indicates the position of the opening in the back side of the cabinet.			N/A		
MAX cut out radius			16			MIN Width of rear opening of the cabinet			0		
FLUSH INSTALLATION						MIN Depth of rear opening of the cabinet			0		
Indicates whether a flush installation is possible. Default is "N"			No			MIN AREA of rear opening of the cabinet			0		
MIN Milling rabbet width			0			MIN distance from cabinet to rear wall			0		
MAX Milling rabbet width			0			Indicates whether a ventilation opening in the top front side of cabinet is needed or not. Default is "N"			No		
MIN Milling rabbet depth			0			MIN Frontal gap of the cabinet			0		
MAX Milling rabbet depth			0			MIN frontal opening area of the cabinet			0		
Milling rabbet thickness			0			INSTALLATION SPACE					
Radius milling rabbet			0			Depth of immersion underneath the appliance			0		
Flush installation KIT (2)			N/A			Width protruding area below bottom box			0		
Indicates the minum worktop thickness with standard installation for gas			0			Depth protruding area below bottom box			0		
Indicates the maximum worktop thickness with standard installation for gas			0			Protruding area: X positioning			0		
Indicates the minum worktop thickness with flush installation for gas			0			Protruding area: Y positioning			0		
Indicates the maximum worktop thickness with flush installation for gas			0			ACCESSORIES FOR INSTALLATION					
WITH OVEN						Gasket			Pre assembled		
Indicates whether the cooktop can be installed above oven. Default is "Y"			Yes								
MIN worktop thickness with oven			20			Clips			Separate		
MAX worktop thickness with oven			50								

DIMENSION		MEASURE	
		KIT	
Injector KIT		N/A	
Elbow KIT		N/A	
COOKTOP HOOD INSTALLATION ONLY FOR GAS			
MIN distance from cooktop to above furniture		0	mm
MIN distance between cabinets above the cooktop		0	mm
MAX distance between cabinets above the cooktop		0	mm
