

Square Edge Laminate Worktops

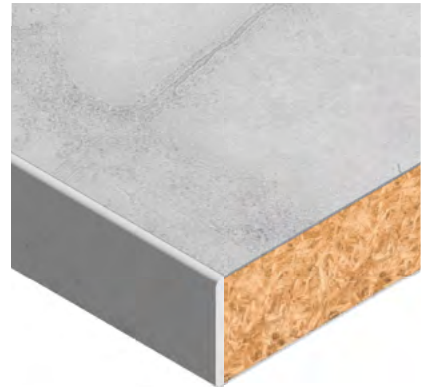

These contemporary style worktops feature a straight Square Edge created from 1.5 mm ABS edging in the same decor, providing a sturdy, solid product with a neat finish. The sleek profile and clean lines make these worktops the perfect choice for any modern or minimalist kitchen design.

ABS is a high-grade thermoplastic that can withstand water, is highly heat resistant, and is not damaged by domestic cleaning products making it perfect for family kitchens.

Our Square Edge Laminate Worktops are available in two thickness options;

38mm thick worktops are made using P2 Particleboard traditionally used in furniture production.

22mm thick worktops are made using P3 particleboard which gives enhanced resistance to moisture.
